 Mobile **300X250** **320X480**

Description

Responsive Carousel layout features an interactive carousel with a static background image. Carousel consists of a 3D stage which can be rotated to reveal further images (up to 6). Dragging left or right rotates the stage in that direction revealing the next or previous image. Backgrounds can be perfectly sized, or using a 2000x1200 image will resize to fit to area of each ad (use this option only if there is no important info on background).

Adding the required images will automatically produce the following 6 mobile and desktop formats.

Carousel	Dimensions (W*H)	Format
x3 Images (UP TO 6)	640 x 640	image (JPG, PNG) video (MP4, GIF)
Backgrounds for any used placement - size @2x		
Rectangles (300X250 AND 336X280)	672 x 560	image (JPG, PNG)
Leaderboard (970X250)	1940 x 500	
Tower (300X600)	600 x 1200	
Mobile (320X480)	640 x 960	
Fit image (NO IMPORTANT INFO)	2000 x 1200	
Additional Assets		
Overlay CTA (BUTTON)	640x150	image (JPG, PNG)
Overlay Logo	640x150	image (JPG, PNG)

Custom Sizes

Adding custom placement sizes is supported.

For placements with a 9:1 ratio and the smaller edge under 100px, the layout is automatic: elements are arranged from left to right (Overlay logo - Carousel module - Overlay CTA).
