

Responsive Panorama

Desktop **300X250** **336X280** **970X250** **300X600**
Mobile **300X250** **320X480**

Description

Responsive Panorama layout features an interactive panorama. Dragging or tilting (if gyro is enabled) side to side moves the panorama in the desired direction. Static overlay elements may be added. Adding the required images will automatically produce the following 6 mobile and desktop formats.

Assets	Dimensions (W*H)	Format
Panorama	At least 1940 x 1200	image (JPG, PNG) video (MP4, GIF)
Overlay element	640 x 640	image (JPG, PNG)

Additional Assets

Overlay CTA (BUTTON)	640x150	image (JPG, PNG)
Overlay Logo	640x150	image (JPG, PNG)

Custom Sizes

Adding custom placement sizes is supported.

For placements with a 9:1 ratio and the smaller edge under 100px, the layout is automatic: elements are arranged from left to right (Overlay logo - Overlay CTA).
